From 1998
Published online
Multidisciplinary
1272 submissions
606 published articles
236 book reviews
75% rejection rate
60 days from the author submission to the editorial decision
Average report time by referees of 30 days
20% of first submission authors from the US

Sample data

Data included 915 submissions, information on 1819 authors and referees, i.e., authors (921), referees (317) and both authors and referees (581)

For each submission, we had: review acceptance/refusal, referee name and recommendation, time taken for reporting, text of the report, editorial decision

For each personal record, we had: disciplinary background, status (e.g. full/associate professor, private researcher or junior researcher), position in the journal, i.e., membership in the journal's editorial board, affiliation and a rating of referee quality assigned by the editor

peereinfo@peere.org

Conclusions

Reviewing is context-specific as it is sensitive to disciplinary & status effects

Diversity premium

No reciprocity between authors/referees

A small-community effect?
